

Contributing to sustainable growth and the realization of a sustainable society through the expansion of business centered on the Musashi Philosophy

The Musashi Philosophy is a common set of values shared by all employees of Musashi. It has taken root as the foundation of corporate activities and individual actions. We have established “Our Purpose” as our mission to contribute sustainable growth and the realization of a sustainable society through our business activities. We have set forth the Musashi 100-Year vision with the slogan “Go Far Beyond!”. Our aim is to disrupt the existing frameworks and become an “essential company” whose existence is needed by society.

To further develop our business, we have identified key issues that we need to fulfil by ascertaining and comparing the expectations, demands, and social issues that our stakeholders have identified with “Our Vision” and “Our Purpose”. We address such issues by creating new value through the development of core businesses and through the creation and expansion of new businesses. In other words, our approach to sustainability is to contribute to solving social issues through our business activities.
